

The World Economic Forum is an independent international organization committed to improving the state of the world by engaging leaders in partnerships to shape global, regional and industry agendas.

Incorporated as a foundation in 1971 and headquartered in Geneva, Switzerland, the World Economic Forum is impartial and not-for-profit; it is tied to no political, partisan or national interests.

As a result of the successful growth of our organization we are now searching for a:

COMMUNITY MANAGER ENERGY UTILITIES AND TECHNOLOGY SECTOR

You will be responsible for the strategy of the utilities and technology sector of the World Economic Forum Energy department and for managing relationships between the Forum and leaders of innovative energy companies. You will act as the primary interface between our organization and key industry sector contacts including CEOs, corporate senior executives, related government ministries and subject matter experts to coordinate their involvement in Forum activities and events, and their engagement in task forces and initiatives. You will work at increasing the number of Partner companies with leadership positions across the world, including Asia, and deepen the relationships with Partners through content development, relationship management and measurement of impact. You will maintain close working relationships with Industry Partners and shape the optimal industry group's composition, including the selection and evaluation processes. You will monitor and synthesize all relevant developments in the industry and work with relevant subject matter experts to identify leading-edge, forward-looking topics of interest. You will also help translate identified issues and priorities into meeting agendas, workstreams and projects. You will maintain account plans for our new and existing Industry Partnerships and design as well as execute industry-related activities such as regional and project meetings.

You will join the Forum as part of our Global Leadership Fellows Programme (www.weforum.org/glf). As such, you will be fully integrated in the World Economic Forum and benefit from an intensive work and learning experience intended to develop and train future leaders of global enterprises and international organizations. The Global Leadership Programme is designed by the World Economic Forum in collaboration with its worldwide network of distinguished experts and leaders.

We expect you to exhibit demonstrated leadership capabilities and possess a broad intellectual background with a Master's degree. You have five to seven years of relevant professional experience in the utilities and energy technology sectors in an international environment. You are fluent in English and at least one other language.

Please apply through www.weforum.org/careers and provide us with a cover letter, your curriculum vitae, three references, an 800-word personal essay on what your motivations are in joining the Global Leadership Programme and what you would like to achieve in your life.
