

The World Economic Forum
is an independent international organization
committed to improving the state of the world by engaging
leaders in partnerships to shape global, regional and industry agendas.

Incorporated as a foundation in 1971, and based in Geneva, Switzerland, the World Economic Forum is impartial and not-for-profit; it is tied to no political, partisan or national interests.

As a result of the successful growth of our organization we are now searching for a:

ASSOCIATE DIRECTOR SURVEY AND ANALYSIS GLOBAL SITUATION SPACE

You will join the newly created Global Situation Space (GSS), which serves as the epicentre of information, analysis and the exchange of insight and know-how on risk preparedness, scenario planning, mitigation, resiliency and response. As the team's expert in survey and analysis, you will apply the latest tools and methodologies, linking core initiatives with appropriate data collection and assessment techniques to support the Global Situation Space. You will manage the overall survey design and analysis for the Forum's Annual Global Risk Report and will advise on approaches to developing and refining other survey and analysis tools. You will interact with a growing community of risk experts from government, industry, civil society and academia, translating complex analysis into a body of knowledge that supports a variety of initiatives within the forum and its various communities. You will contribute to the development of specific projects, tools and products and services that will support cross-sectoral views, knowledge and initiatives to advance the Forum's network of global risk expertise. You will also help develop ideas for the Forum's summits and meetings, contributing to forward-thinking discussions related to both public sector and private sector collaboration in global risk management.

You possess a broad intellectual background with a Master's degree or PhD in economics, public policy, mathematics or other appropriate field. You have 10 or more years' relevant professional experience, ideally in more than one sector, with a proven track record in managing complex data analysis as well as a keen understanding of stakeholder facilitation and collaboration.

You have demonstrated leadership capabilities, outstanding quantitative skills, creative thinking and a commitment to the collective output of a project team, and enjoy working in a highly collaborative, fast-paced environment. You have excellent presentation and communication skills and a perfect command of written and spoken English; other languages are a plus.

If you possess the relevant qualifications and background and if you thrive in a highly demanding environment, please apply through our website:
